EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEERING INTERN
Amazon | August 2022 - December 2022, Luxembourg

I was part of the EMEA localization team that builds, maintains and operates the systems that localize at scale catalog products from one Amazon marketplace to another.
- Implemented several features for Amazon Private Brands (using Java) and an internal manual submission GUI tool.
- Designed and implemented software updates to the localization system, resulting in improved latency, accuracy and flexibility.

INTERNSHIP / PROJECT
Alliander | April 2022 - June 2022, Remote

Implemented an API (Python with FastAPI) and GUI (TypeScript with Electron) for planning optimal cable routes for new energy infrastructure.
We worked in a team of five using Scrum methodology.

INTERNSHIP
forkNAV | August 2021, Remote

Wrote the test suite for their web app using Selenium Webdriver.

EDUCATION

ENTREPRENEURSHIP (MINOR)
University of Amsterdam | 2023 - 2024, Amsterdam (Netherlands)

As a part of the minor, we are currently creating a startup. Our startup builds AI-based call bots for companies to answer their customer service phone calls.
As the CTO, I am responsible for the product development. Our system is implemented using Python with Flask alongside the OpenAI and Twilio libraries.

COMPUTER SCIENCE AND ENGINEERING (BSC)
Delft University of Technology | 2020 - 2024, Delft (Netherlands)
(Projected) GPA: 8.0 (out of 10).

HIGH SCHOOL
Gustav Adolf Grammar School | 2017 - 2020, Tallinn (Estonia)
Graduated with a gold medal (all A's).
